About Me

- **LinkedIn** - www.linkedin.com/in/aman-kutlaria08
- **GitHub** - <https://github.com/Amankutlaria>

Strong in design and integration with intuitive problem-solving skills. Proficient in JavaScript with good DSA fundamentals. Passionate about working with and learning new technologies. Experienced in working with International clients. Excellent analytical and problem-solving skills, coupled with a strong attention to detail and the ability to work collaboratively in a team environment.

Skills

JavaScript, HTML, CSS, React.js, C++, GitHub, Node.js, MongoDB

Education

Vidya College of Engineering | Meerut, UP
Computer Science | 05/2022

Experience

Okaya Infocom | Noida, UP
US IT Recruiter | 03/2022 - 01/2023

- Conducted full-cycle recruitment for a wide range of IT positions, including software developers, systems administrators, network engineers, and data analysts.
- Utilized various sourcing methods, such as job boards, social media platforms, and professional networks, to attract top IT talent.
- Screened and interviewed candidates to assess technical skills, experience and cultural fit.
- Coordinated and scheduled interviews between candidates and hiring managers, providing timely updates and feedback to both parties.
- Managed the applicant tracking system (ATS) to track candidate progress and maintain accurate records.
- Developed and maintained strong relationships with candidates, building a talent pipeline for future hiring needs.

Projects

1. Guess-My-Number

Description:

Developed an interactive and user-friendly "Guess my number" game using HTML, CSS, and JavaScript. The game prompts the user to guess a randomly generated number within a specified range. Implemented features such as user feedback, score tracking, and responsive design for optimal user experience across devices.

- Successfully created a fully functional and engaging game to enhance user experience.
- Implemented a scoring system and user feedback for an interactive and enjoyable gameplay.
- Applied responsive design principles to ensure a seamless experience on various screen sizes.

Key Technologies:

- Frontend: HTML, CSS, JavaScript (ES6+)
- Styling: Responsive design for cross-device compatibility

2. Two-Player Pig Game

Description:

Developed an interactive two-player "Pig Game" using HTML, CSS, and JavaScript. The game follows the classic rules of Pig, where two players take turns rolling dice to accumulate points. Implemented dynamic UI updates, player turn logic, and a clear scoring system. Added features such as winning conditions, game resets, and a responsive design for optimal gameplay on various devices.

- Successfully implemented a two-player game with clear rules and intuitive user interaction.
- Designed and developed an engaging UI that enhances the overall gaming experience.
- Managed game state and player turns efficiently, ensuring smooth gameplay.

Key Technologies:

- Frontend: HTML, CSS, JavaScript

Key Features:

- Two-player functionality with alternating turns.
- Real-time score tracking and dynamic UI updates.
- Winning conditions and game reset functionality.
- Responsive design for seamless gameplay on different devices.
